Brainstorming & Idea Prioritization Template

Date	03 October 2026
Team ID	2
Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member listed ideas for an AI-powered fitness planning assistant without judging them. Ideas were then grouped by theme.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Naveen Kumar S 2024503026	Generate a personalized 7-day workout plan from age, weight, goal, intensity and experience using Gemini	Core AI feature	1
2	Naveen Kumar S 2024503026	Return the plan as structured JSON (days, exercises, sets, reps, rest) instead of free text	AI reliability	1
3	A Chethana Sri 2024503524	Let users give plain-language feedback ("more cardio", "no equipment") and regenerate the plan	Personalization	2
4	A Chethana Sri 2024503524	Show the plan as clean day cards with rest days highlighted and a print option	User interface	3
5	Naveen Kumar S 2024503026	Keep every plan revision so users can compare original and updated plans	Data / storage	2
6	Naveen Kumar S 2024503026	Short goal-based nutrition / recovery tip under the plan using a lighter, faster model	Core AI feature	1
7	A Chethana Sri 2024503524	Password-protected admin / coach dashboard listing all users and their plans	Admin / reporting	4
8	A Chethana Sri 2024503524	Demo mode that works without an API key so the app can always be demonstrated	Reliability	4
9	Naveen Kumar S 2024503026	Calorie counter and meal-plan generator	Nutrition	5
10	A Chethana Sri 2024503524	Wearable / step-counter integration to adapt plans automatically	Integration	5
11	Naveen Kumar S 2024503026	Exercise demo videos for every movement	Content	5

Step 2: Idea Prioritization

Each grouped idea was rated on feasibility (can it be built and tested within the project window with FastAPI, SQLite and the Gemini API?) and importance (does it solve the core user problem?).

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	AI plan generation (structured 7-day plan) + nutrition/recovery tip with two Gemini model roles	High	High	1	Yes
2	Feedback-based plan revision with full version history	High	High	2	Yes
3	Card-based responsive UI with print support	High	Medium	3	Yes
4	Admin dashboard (protected) + demo mode for reliable demos	High	Medium	4	Yes
5	Meal plans, wearables, exercise videos	Low	Medium	5	No (future scope)

Outcome: Groups 1–4 form the FitBuddy scope. They map directly to the four scenarios in the project brief (plan generation, feedback revision, nutrition tip, admin dashboard). Group 5 needs external data sources or medical-grade nutrition logic and is kept as future scope.
