Empathy Map

The empathy map captures our primary user, a beginner who wants a personalized fitness plan, from four perspectives.

SAYS

- "I don't know where to start at the gym."
- "I want to lose belly fat and gain muscle."
- "Trainers are too expensive for me."
- "This plan is too hard, I need more rest days."

THINKS

- Am I doing the right exercises for my body and level?
- Will I get injured if I train too hard?
- Online plans are made for someone else, not me.
- I need something I can stick to every week.

PERSONA
Arjun, 21
College student, gym beginner, 70 kg
Goal: fat loss + muscle gain

DOES

- Watches random workout videos and copies routines
- Skips sessions when a plan feels too hard
- Searches for diet tips without knowing which apply
- Tries fitness apps but drops them after a week

FEELS

- Confused by conflicting advice
- Unmotivated when progress is slow
- Anxious about injury and doing it wrong
- Excited when given a clear, achievable plan

Pains

- Plans are not personalized to age, weight or experience
- No easy way to adjust a plan
- Fear of injury and doing exercises wrong

Gains (what FitBuddy provides)

- A clear 7-day plan with sets, reps, rest and form cues in seconds
- Plain-language feedback that updates the plan while keeping the old versions
- A short nutrition / recovery tip matched to the goal
- Safety rules for teens, older adults and heavier users, plus a medical disclaimer
