Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Maximum Marks	2 Marks

Customer Journey Map

The journey follows our persona (a beginner, see Empathy Map) from discovering FitBuddy to refining a personal plan. An admin / coach journey (login → view all users → compare original vs latest plan → delete) runs in parallel on the protected dashboard.

Phase of Journey	**Stage 1: Discover**	**Stage 2: Enter profile**	**Stage 3: Receive plan**	**Stage 4: Refine via feedback**
Actions What does the customer do?	• Opens FitBuddy home page • Reads what the app does	• Enters name, age, weight, goal, intensity, experience • Clicks Generate Plan	• Reviews 7 day cards and the nutrition tip • Prints or saves the plan	• Types feedback, e.g. "more cardio, shorter workouts" • Compares new version with old
Touchpoint What part of the service do they interact with?	• index.html landing form	• Form validation • Loading state "Generating your plan…"	• result.html day cards • 💡 tip card • Print button	• Feedback form with example chips • Version history links • Update confirmation banner
Customer Thought	• "Will this be personal or generic?"	• "Is it asking the right things about me?"	• "This is clear — I know what to do each day."	• "It actually listened to what I asked for."
Customer Feeling	Curious, slightly skeptical	Hopeful, a little impatient while waiting	Motivated, confident	Satisfied, in control
Process Ownership Who is in the lead?	Frontend (UI)	Backend validation + Gemini plan generation	Frontend rendering + tip model	Revision service + database (versioning)

Phase of Journey	Stage 1: Discover	Stage 2: Enter profile	Stage 3: Receive plan	Stage 4: Refine via feedback
Opportunities How can we improve this stage?	• Show a sample plan preview	• Progress indicator during the 5–15 s generation • Tooltips explaining intensity/experience	• Export to calendar • Exercise demo links	• Side-by-side diff of versions • Progress check-ins after a week
